Prabhakar R

Software Developer | Web Development | Python

Chennai, Tamil Nadu, India | +91-9042919792
raviprabahar2006@gmail.com | LinkedIn | GitHub

Professional Summary

Computer Science and Engineering student with hands-on experience building web applications, Python-based tools, and machine learning projects. Familiar with Java, Python, JavaScript, SQL, database management, REST APIs, and Git. Interested in developing reliable, user-focused software solutions, learning new technologies, and contributing to collaborative engineering teams. Passionate about continuous learning and applying problem-solving skills to build scalable applications while contributing effectively to team goals and organizational success.

Technical Skills

Programming: Java, Python, JavaScript
Web Development: HTML5, CSS3, Responsive Web Design, Flask, REST APIs
Databases: MySQL, MongoDB, SQLite
AI and Machine Learning: Scikit-learn, Ollama, Local LLM Integration
Tools and Platforms: Git, GitHub, VS Code, Postman, AWS

Non-Technical Skills

Problem Solving, Communication, Teamwork, Adaptability, Time Management, Continuous Learning

Education

J.N.N. Institute of Engineering *2023 – 2027*
B.E. in Computer Science and Engineering CGPA: 8.67/10
Sri Sathya Sai Vidhya Vihar Hr. Sec. School *2021 – 2023*
Higher Secondary Certificate (Class XII) 70%
Sri Sathya Sai Vidhya Vihar Hr. Sec. School *2020 – 2021*
Secondary School Certificate (Class X) 100%

Projects

SRS4DEV – AI-Powered SRS Generator *Python, Flask, JavaScript, SQLite, Ollama*

- Developed a web application that assists in gathering software requirements and generating structured SRS documents.
- Integrated a locally running language model through Ollama to support requirement elicitation without cloud AI APIs.
- Implemented a web-based workflow for requirement collection, project context management, and document generation.
- Designed a structured workflow to organize project requirements and maintain requirement context throughout the elicitation process.

BookLoop – Book Discovery and Exchange Platform *HTML, CSS, JavaScript, Python, Flask, MySQL*

- Developed a book-focused web interface for exploring listings, managing book-related information, and navigating user features.
- Organized the application into reusable frontend assets, page modules, and backend components.
- Worked on user-facing features including book listings, offers, wishlists, profiles, and dashboard interfaces.
- Integrated frontend components with backend functionality to support a more organized and consistent book management experience.

DDoS Detection and Mitigation in SDN *Python, Machine Learning, Mininet, Ryu*

- Developed a machine learning approach to identifying potential Distributed Denial-of-Service attacks in SDN networks.
- Explored Decision Tree, KNN, Logistic Regression, Naive Bayes, SVM, and Random Forest classification techniques.
- Worked with Mininet and the Ryu controller to study network traffic analysis and attack detection and mitigation workflows.
- Compared classification model performance to identify a suitable machine learning approach for network attack detection.

Training and Certifications

Intel Unnati Industrial Training – AI/ML for Networking and Software-Defined Networking, 2025
Harvard CS50x – Introduction to Computer Science
Harvard CS50P – Introduction to Programming with Python
NPTEL – Ethical Hacking
